

 XpressCash™

*Discover greater security,
flexibility and control with retail
cash automation*

Take cash handling to the next level

The XpressCash™ cash automation software is a complete, integrated solution that handles cash transactions securely and efficiently with the highest degree of accuracy. The solution keeps cashiers, tills and store locations in balance to the cash receipts with full audit and transaction reporting. The return on investment begins immediately as you realize benefits in labor utilization, cash security, operational efficiency, and faster deposits.

Make balancing to the POS faster and easier

The XpressCash solution has an intuitive interface that guides users through cash-in/cash-out functions. The software controls the cash recycler and optimizes its ability to count, validate, secure and dispense cash according to security settings and user roles. For store and cashier or lane balancing, an easy manual input confirms each cashier or till is in balance in seconds.

Ultimately, you gain peace of mind that your processes are being followed and your cash is counted and secure. The solution:

- Ensures accuracy with dual verification of currency count and validation
- Provides accountability for each cashier's balance to their daily cash receipts from the POS system
- Maintains specific totals and denomination mixes to reduce bank deposits and CIT costs
- Provides a complete audit trail for all transactions and users to ensure process compliance
- Supports payments to vendors, with detailed transaction logs, from cash stored in the device

Did you know?

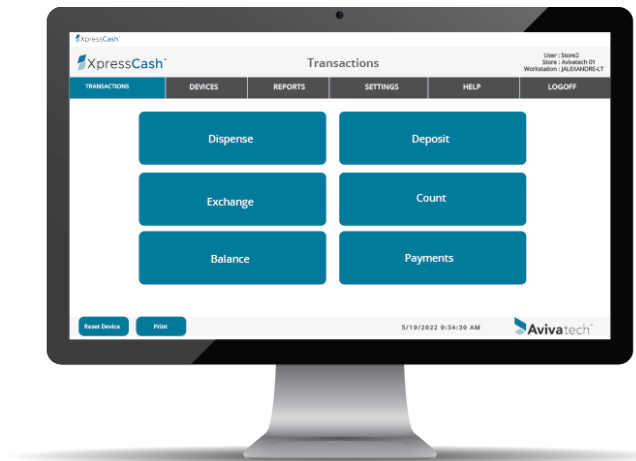

The average retailer spends 9.1% of the value of their cash transactions counting, recounting, auditing and depositing cash.*

Gain Greater Control of Your Cash Operations

The XpressCash solution is designed for any cash-intensive retail setting and works with more than 25 cash recyclers on the market. Plus, the solution gives you flexibility as you add additional staff or scale operations. XpressCash software offers:

- Automated deposit preparation
- Anywhere, anytime reports for insights for cash planning and assessing cash on hand, process efficiency and device functionality
- Visibility into device utilization and performance to help you achieve a return on investment on each cash recycler or dispenser

Deploy a Complete Transaction Automation Solution

The XpressCash solution works with the XpressScan™ check automation solution and the XpressControl™ enterprise dashboard, which delivers visibility and monitors performance of your entire cash and check handling network, across all locations. These integrated solutions maximize your success by delivering next-level transaction efficiency and total control.
